

Karmak Legend[®] Business System

Version 6.1 Email Feature

What it is:

The email feature within the Legend Business System Version 6.1 allows customers to email certain documents directly from their Legend system. A prompt in the reprint invoice program allows the user to quickly send an email with a PDF copy of an invoice. Original parts invoices and original service invoices can be sent automatically without action by the user. Accounts Receivable month-end statements can be sent automatically. A prompt in the individual statement request program allows the user to quickly send an email with a PDF copy of a statement.

What it does:

The email feature within Legend V6.1 allows customers to email invoices and statements directly from their Legend system.

How it does it:

The email feature utilizes SMTP on the Legend business system and acts as a mail server to send email with PDF copies of invoices and statements to customers.

Customer Benefits:

- Automatically send parts and service invoices as an attached PDF to your customers via email
- Automatically send month-end statements as an attached PDF to your customers via email
- Manually send reprints of parts, service, lease, and rental invoices as an attached PDF to customers via email
- Manually send reprints of customer statements as an attached PDF to your customers via email

Legend requirements

- An AlphaServer or Integrity system with OpenVMS V8.3 or higher
- Dedicated Internet access connected to the Legend system
- Internet domain for your company, such as www.yourcompany.com
- GrayMatter ScriptServer software for the Legend system
 - This software also allows laser printing – you may already have it
- GrayMatter ScriptServer electronic forms for invoice, statement, etc. (if company logo or name/address is required on email copies)
 - If using laser printing, you may already have the necessary forms
- GhostScript free open source software
 - Is used to create the PDF files for emails
- Outbound SMTP on port 25 must be allowed

Hardware/software requirements

- An AlphaServer or Integrity system with OpenVMS V8.3 or higher
- Karmak can provide assistance with hardware and software needs

Training requirements

Telephone and web-based training is provided by Karmak.

Installation

Installation of Legend V6.1 will be completed by the customer, with assistance provided by Karmak as needed. Installation of other software on the Legend system will be completed by Karmak personnel.

Development team

Karmak's Legend Development group

Target market

Any Legend client that meets the minimum requirements
